

≡ TDSB150

(2) 200W SOLAR PANEL PROVIDES A CHARGE FOR THE 150AH BATTERIES

Power generation:	200W max
-------------------	----------

Power generation voltage:	16(V) max
---------------------------	-----------

Power generation current:	12.5(A) max
---------------------------	-------------

Battery capacity:	12V.150AH
-------------------	-----------

Power status display:	Digital voltage display
-----------------------	-------------------------

Charge/discharge protection current:	20A
--------------------------------------	-----

Short circuit protection current:	20A
-----------------------------------	-----

Overcharge protection voltage:	12.6V
--------------------------------	-------

Over discharge protection voltage:	9.6V
------------------------------------	------

External charging power supply:	12.6V5A
---------------------------------	---------

Full charge life:	within 30W about 150AH $\leq$ 96H
-------------------	-----------------------------------

Panel size	26.3"x35.4" per panel
------------	-----------------------

Weight:	68.3lb
---------	--------
